Services We Provide:

Acupuncture:

By using extremely fine, hair-thin, flexible needles to stimulate certain points along the course of the meridians, acupuncture helps restore the normal balance and flow of Qi so organs and bodily systems can work together in harmony as intended.

Chinese Herbology:

Most Chinese Herbal Formulas consist of between two to eighteen herbs. Formulas treat a wide variety of symptoms while stimulating the body's natural healing process.

Acupuncture Point Injection Therapy:

By combining the actions of acupuncture with the pharmacological effects of Chinese medicinal herbs or biomedical pharmaceuticals, point injection therapy utilizes the injection of these substances into acupuncture points to prevent or treat diseases. It is one of the most integrated treatment strategies available in the 21st Century. Dr. Liang is one of the leading experts in this field applying this approach and he holds an injection therapy certification class annually.
